

Breast Prosthesis

Use and Care Instructions

How to Use Your Breast Prosthesis

- Slip the prosthesis into the pocket of the mastectomy bra.
- After inserting the prosthesis inside the bra, minor adjustments may need to be made
- DO NOT use your breast prosthesis on open or broken skin.

How to care for your breast prosthesis

- Gently wash your form regularly using warm water and mild soap
- After washing, rinse thoroughly and pat dry with a lint free cloth
- Never wring, rub, use abrasive cleaners, acetone, alcohol, or any other solvent on your breast form.

Important Notes about your breast prosthesis

Should you experience a skin rash or other irritation, immediately discontinue use and seek medical advice. Never hesitate to call you mastectomy fitter with any questions or problems that may arise.
